BEN KAPON

DATA ENGINEER | PYTHON • SQL • ETL

Tel Aviv, Israel • 058-4219694 • benj.kn@gmail.com

Data Engineer with 8+ years of experience building production software and data systems, including 4+ years focused on data engineering. Experienced in Python, SQL, ETL/ELT, dbt-based transformations and GCP pipeline orchestration, building reliable data workflows for analytics, reporting, and ML use cases.

EXPERIENCE

Data Engineer

May 2023 - April 2026

RoundForest Tel Aviv, Israel

- Refactored business-critical data pipelines, modernizing architecture while preserving data contracts and output consistency
- Designed and maintained end-to-end data pipelines, using dbt for data transformations and SQL for analytics-ready datasets supporting reporting, analytics, and ML use cases.
- Managed Google Cloud Composer environments and developed and maintained Apache Airflow DAGs to orchestrate and schedule data pipeline workflows across GCP services
- Replaced legacy processing with event-driven architecture using GCP services, improving system stability and consistency
- Built monitoring, anomaly detection, and alerting systems, providing end-to-end ownership of production data quality
- Introduced real-time data processing that accelerated A/B testing cycles from several weeks to a few days

Data Engineer

Jan 2022 - Jan 2023

Trax Retail Tel Aviv, Israel

- Managed and maintained data collection pipelines supporting ML training and model accuracy measurement
- Designed and implemented decoupled data services for a global data-collection platform, improving separation of concerns and scalability
- Delivered architectural improvements to data-collection workflows with significant impact on business operations

Full Stack Developer

Nov 2019 Jan 2022

Trax Retail Tel Aviv, Israel

- Maintained and modernized production services, refactoring legacy components and improving system architecture

Full Stack Developer – JavaScript Expert

Sep 2017 Oct 2019

Hippotec Tel Aviv, Israel

- Developed MVP web applications across frontend, backend, and database layers, working directly with clients on delivery

SKILLS

Data Engineering Python, SQL, ETL/ELT, dbt (data models, transformation, documentation, dependencies), data pipelines, data modeling, data quality, anomaly detection

Cloud GCP (BigQuery, Cloud Composer, Apache Airflow, Pub/Sub, Cloud Functions, Workflows, Scheduler), AWS

Databases BigQuery, PostgreSQL, MySQL, MongoDB, Redis

Architecture Event-driven architecture, REST APIs, Terraform, Docker, Kubernetes, microservices

Tools Git, CI/CD, DataDog, Grafana, Looker, Slack integrations

EDUCATION

B.Sc. Mechanical Engineering & Industrial Management — Aristotle University of Thessaloniki, Greece, 2009–2015

Coding Bootcamp — Elevation Academy, Tel Aviv, Israel, 2016–2017

LANGUAGES

Greek (Native) • English (Proficient) • Hebrew (Intermediate) • French (Basic)
